"Software for the finest computer - the Mind"

LIBERAL KRYPTONITE - New Book!

Tim is an essayist and radio commentator who has written on such things as business management, technology, politics, our changing world, and profiles of the American character. Tim's work varies from being educational one moment, to controversial or humorous the next. He describes it as "Software for the finest computer - the Mind" as he is asking his readers to think about things they either take for granted or simply overlook.

"LIBERAL KRYPTONITE" - Tim's political writings warning America about the liberal agenda.

211 pages; ISBN-13: 9211 pages; 78-1503126893 ISBN-10: 1503126897

Liberals are the true enemies of the country, not outsiders. The point of this book, therefore, is to familiarize yourself with the enemy. Included are chapters on Problems, Liberals, The Media, Capitalism, History, and much more. These essays may seem innocent on the surface yet are despised by the left, which is why it is referred to as "Liberal Kryptonite."

"I enjoyed the optimism many of the articles had and I liked where you talked about generational politics. Overall, this presented optimism, hope and faith for the people of this country."

- Pat Shelton, Kansas

"A New Contract with America and 10 Most Wanted Lists were excellent as were all the articles on common sense economic issues. Your writings will definitely help educate people. The essays just wet my appetite for more of your common sense writing."

- Helena Nunn, Florida
